Welcome!

Our mission is to provide commercial growers with quality horticultural supplies and service at a fair price. We offer only proven products based on our experience and your feedback. With 35+ years in business, we are constantly expanding our inventory & staff to serve you better. In 2016 we opened this location. All our greenhouse related products are at this location. All our produce related products and seeds are at [Nolt's Produce Supplies](#) which is now located directly across the street.

We strive to stock all products listed. Unfortunately sometimes there's unforeseen supply & demand changes that result in shortages, or extended lead times. We reserve the right to refuse orders for any items in short supply that you haven't been buying historically. Returning customers are our priority. We reserve the right to prorate any items in short supply. Product specifications and prices are subject to change without notice and substitute products may occasionally be shipped.

We encourage you to submit your orders a few weeks before pickup or ship date, to allow us time to process your order. Please pickup orders no later than the month after ordering. Orders after 30 days will be subject to available supply and price.

Upon receiving your order please inspect it immediately and report any error, shortage or damage within 10 days. We constantly strive to meet or exceed your expectations by carefully packaging and processing your order. However, we are all human, and errors can occur. If you wait to inspect your order until the day you want to use the product, it is difficult to determine where the error occurred. [Nolt's Greenhouse Supplies](#) is not responsible for shortages reported more than 10 days after receipt.

Returns: Saleable products may be returned with permission and may be subject to handling charges based on the condition and time of return for seasonal products. Expired products, special order, and non-stock items are **not** returnable.

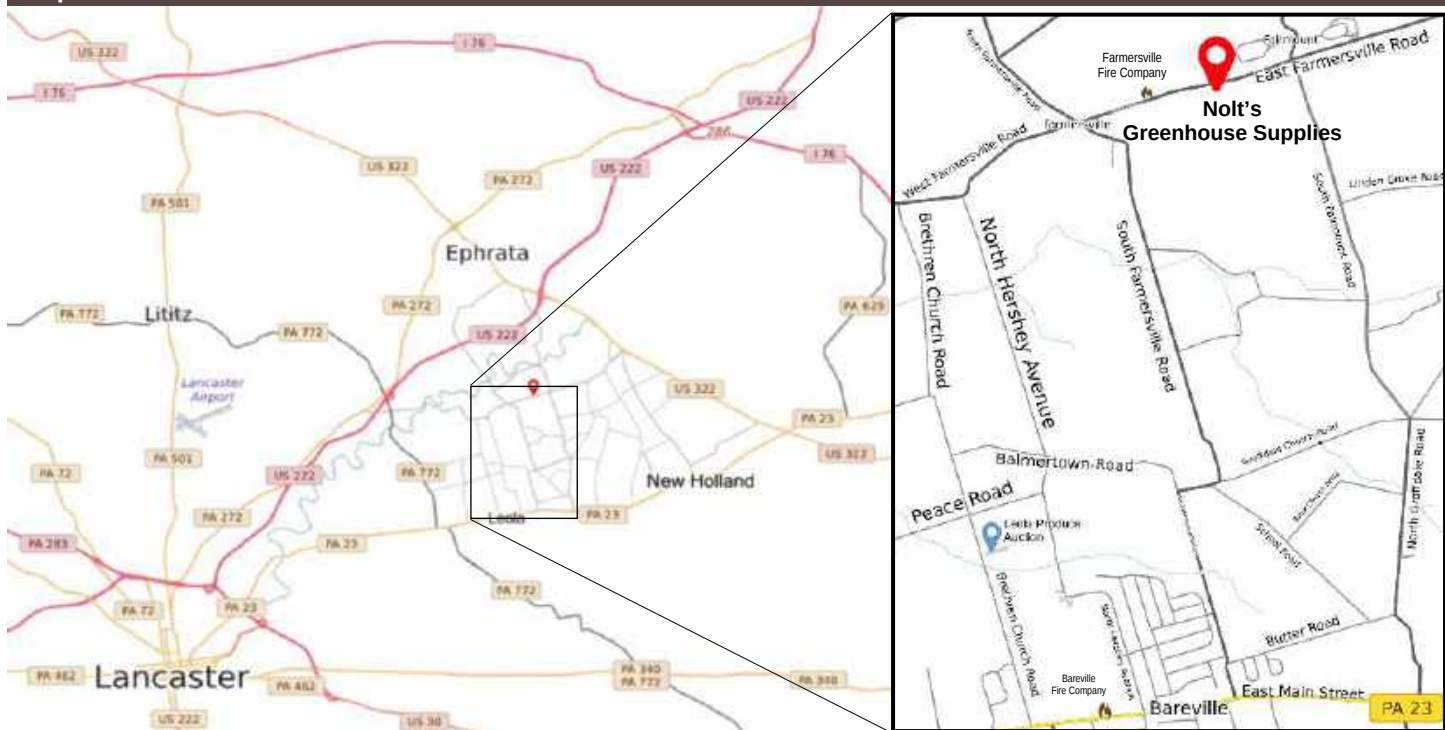

Credit Invoices: In the case of overpayments, cancellations, shortages, returns, defective products, etc. credit invoices will be issued. Credit invoices not used will be mailed twice a year, but may be subject to deletion after 15 months.

All prices are FOB Ephrata, PA (except items with indicated FOB point) and are subject to change without notice. Contact us for pricing discounts on large quantity orders.

Thank you for your continued support and another successful year! Wishing you God's blessings in the new growing season.

What is Biofungicide? *Bacillus pumilus (GHA180)*

Biofungicide is a naturally occurring strain of bacteria that combats harmful organisms such as Fusarium, Pythium and Rhizoctonia. Helps prevent root diseases and damping-off. The bacteria also act as a biostimulant that enhances the establishment and the development of the root system, leading to more uniform plant stands.

What is MYCORRHIZAE™? (*Glomus intraradices*)

Mycorrhizae is a biological growth enhancer that is found naturally in soils around the world. Benefits:

- More efficient acquisition of water and nutrients.
- Improved plant survival after planting into field and garden soil.
- Increased crop vigor, plant quality and quantity of flowers/fruit.

Pro-mix FPX (Germination Mix)

This fine grind mix is designed for plug growing and germination. **Ingredients:** Canadian sphagnum peat moss, plug grade (80-90%); Fine Perlite; Limestone (pH adjuster); Wetting Agent.

Vermiculite & Perlite

Horticultural grade. Both vermiculite and perlite are used in to prevent soil compaction, improve aeration and retain moisture. Vermiculite acts more like a sponge, holding more water than perlite and offering less aeration. Perlite retains water on its surface, but it is porous and allows excess water to drain more readily than vermiculite and improves soil aeration.

We can help you with all your benching needs. Assemble your own for around \$4-5 per square foot by using plastic bench tops & the components listed below. With these materials you will have a bench that lasts a long time, maybe even a lifetime. A cheaper option is using 2x4s with plastic bench tops or wire mesh. We can quote on complete bench systems.

Greenhouse Benches

Heavy-duty galvanized square tubing frame with reinforced smooth corners, SS fasteners and A-V plastic bench tops (above) makes this bench exceptional durable. Plastic bench tops prevent the growth of mold and fungus and outlast most other types of benches. For shipping/transport purposes we sell the benches without legs. Use below leg kits, or for easy to stow benches use cement blocks. Made in-house. Call for prices on custom sizes.

Agritape Heat Mat Systems

An Agritape system consists of a control unit to regulate soil temperature, the Agritape Heat Mat, and a grounding screen. The screen serves to safely ground the current if the tape is damaged.

To install a system, roll out the Heat Mat and plug it into the control unit. Cover the Heat Mat with the ground screen. Connect the ground wire from the control unit to the screen. Plug in the control unit and place the sensor in the soil of the seed tray or container. Set to the desired soil temperature. Agritape will warm soil temperature by a maximum of 20°F (more with a humidity dome) above room temperature.

Does not work with GFCI outlets.

Electric current flows through black bars (which are a resistive/conductive material) to create a virtually continuous heat pattern.

Control Units: (Multi-outlet power strips can be used to add mats to a controller, however, do not exceed amp rating or max amount of tape.)

Dramm® Mini AutoFog™

(See page 51 for Fogit greenhouse sprayers.)

The Dramm Mini AutoFog is an easy to use, low volume chemical applicator designed with smaller greenhouses in mind. It can treat 5,000 sq. ft. automatically without an operator present. It can easily apply a wide variety of chemical formulations using a highly concentrated spray solution. A specially designed nozzle generates billions of micro-particles (0.05 - 10.0 microns) that fill the entire treatment area with active chemical. These tiny particles ensure complete and even coverage of all plant surfaces. This "low-volume" method of applying chemical solutions eliminates costly run-off and reduces the amount of chemical needed. 24 Hour timer, starts and stops automatically. Durable oilless compressor for even supply of air. 60 rpm mechanical agitation—keeps chemicals in suspension.

Standard Treatment Area: Up to 5,000 sq. Ft. (7,000 sq ft with circulation fans)

Nozzle: Air atomizing, outputs 8 liters in 4 hours.

Adjustable Nozzle Height: 5-7 ft.

Tank size: 8 Liters (8.45 quarts)

Item #	Description	Price
DFA10SS	110 Volt Mini AutoFog™ with SS Nozzle	\$4480.00

Dramm® K-10 Portable PulsFOG®

The PulsFOG thermal fogger is perfect for the rapid application of greenhouse chemicals. Designed to expel chemicals at great distances and speed, reduces application time and ensures even coverage of all surfaces with a highly dense, visible fog.

Perfect for the application of insecticides, fungicides, and disinfectants.

Propels chemical: 45 ft with NutriFog, 100 ft with VK-1 (more with the help of circulation fans)

Output: 10 liters (2.6 gal) in 45 minutes.

Item #	Description	Price
DFP10	25 Hp 2.6 gallon Thermo Fogger	\$3,365.00

NutriFOG

For best results, the PulsFOG requires the use of carrier solution. It helps to create more even particle size, distribute the solution throughout the area, and retard evaporation of fog droplets. This carrier is a 10-3-3 Foliar Fertilizer. It can be used with all chemical formulations. It is safe on ornamentals, fruits & vegetables.

Do not use more than five times in one month on the same crop.

Rates for NutriFOG:

- 0.25 Quart NutriFOG Solution
- 1.75 Quarts Water
- Apply above mix into 10,000 square feet of area

Chemilizer Proportional Injector, 11 GPM

The big advantage of this unit is that the chemical pump takes all the abuse of the chemicals and is easy to disassemble or replace by hand. Parts are inexpensive, too. The water powered motor is never contaminated by any chemicals and comes with a 2-year warranty. This proportional fertilizer injector automatically compensates for any change in water pressure or flow to provide a constant mix at 1:100 rate.

Max Temperature: 100° F Standard pump: fixed ratio 1:100.

Flow Rate: 1.2 – 660 gph (0.02 – 11 gpm) Operating Pressure: 3 – 85 psi.

Connections: 3/4" male hose thread.

Optional Adjustable pump: 1:50-1:164 add \$76.00 to unit cost.

Toro® Aqua-Traxx® Drip Tape

Typically used as a single year alternative to Blueline (see below), but isn't pressure compensating. Engineering-grade virgin resins and seamless construction add durability. The PBX Advantage increases durability, clog resistance and uniformity to set Aqua-Traxx apart from lesser drip tapes. BlueLine® PC Pressure Compensating Dripline

18MM (½") Orchard Tubing with Built-In Emitters

Features a unique, built-in flow regulated emitter, providing a constant discharge over a pressure range of 15-60 PSI. The emitter is inseparably welded to the inside wall of the tubing as it is extruded in the manufacturing process. Emitters are factory installed at pre-determined intervals. This one-piece construction prevents damage and loss of drippers, eliminates hole punching and handling damage, reduces installation costs.

BlueLine™ PC may be hung on a wire, laid on the surface or buried. Typically used in orchards, vineyards, over top of containers/mum pots, nurseries, or buried in fields for subsurface applications. Stock Flow: 0.53 GPH per emitter.

Item #	Description	Emitter Spacing	Price
DRP1812	18 MM (½") x 1000'	12" spacing	\$150.00
DRP1818	18 MM (½") x 1000'	18" spacing	\$145.00
DRP1824	18 MM (½") x 1000'	24" spacing	\$135.00
DRP1830	18 MM (½") x 1000'	30" spacing	\$133.00
DRP1836	18 MM (½") x 1000'	36" spacing	\$130.00
DRP16	Plastic Stake to secure ½" tubing		\$0.22

Raised inlets ensure that sediment deposits at the bottom of the tube do not enter the emitter.

Streamlined nature of the emitter encourages debris to pass by rather than enter the inlets.

Blue Stripe® Orchard Tubing

This lightweight polyethylene tubing is punchable and is often used for a lateral distribution & supply hose for on-line drippers, weighted drip tubes, micro-sprinklers and can be used as a headline for small drip tape systems.

NaanDan Jain® Foggers/Misters

Performance Micro-Sprinklers and Sprayers

Commonly used for propagation, cooling and humidification in greenhouses. Contact us for design information. Recommended Pressure: 55 – 60 PSI.

For mounting/hanging options see Modular Group Sprinklers/Sprayers on page 33.

Installation Recommendations:

One fogger should be used for every 2.5 square feet. The cross with four foggers will cover an area up to 10 square feet (3 – 4 feet wide).

Foggers should be installed at a height of 3 – 5 feet above the propagation material.

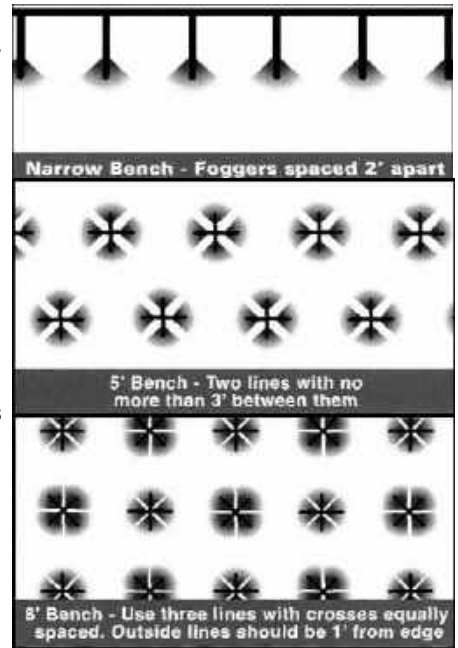

The spacing between the fogger assemblies should be 3 feet.

Multiple flow rates available for different precipitation rates.

3' – 4' Bench: One line above the center.

6' – 7' Bench: Two lines with crosses are required.

To prevent dry edges on a single bench (no other benches within 2') the cross should not be further than 1' from the edge. In some instances two lines may be required on a 4' bench.

LED Grow Lights

These LED grow lights are designed for supplemental light—not intended to be able to grow plants without the aid of sunshine. Standalone design—no fixture needed—these LED tube lights are easy to install with included hardware.

- No wiring needed when using our integrated cords. Daisy chain up to 2 lights (96 watts). You can daisy chain more, but that voids warranty.
- **Energy saving:** Uses less energy and produce less heat than full spectrum lights. 100% of the power input is used for your plant chlorophyll production.
- These lights have special red & blue mixing LED bulbs. 3 parts red for every 2 parts blue. Different color light helps plants achieve different goals. The blue light helps encourage vegetative leaf growth. Red light, when combined with blue, allows plants to flower. *Call for prices on quantities of 48 or more.*

Senninger® Xcel-Wobblers

The Xcel-Wobbler uses Senninger's off-center rotary-action technology. It provides an extremely uniform and instantaneous application pattern over a large area at lower pressures, and with very low evaporative loss and wind drift. Wobblers are designed for nursery irrigation and frost protection. Wobblers installed in test bed withstood winds up to 25 MPH and temperatures as low as 18°. They are an excellent sprinkler for small diameters from 35 to 56 feet. The Xcel has less vibration than earlier models.

Diameter at 1.5' height.

White on Black Woven Ground Cover

3.8 oz./sq. Yd. Turn white up to reflect the sun and heat.

For applications where cooler soil & sunlight reflection is preferred. Very similar to our black woven ground cover, except stronger, and this product has white and black strands interwoven. Mostly white on top side (to reflect sun & heat) and mostly black on the opposite side (underside) to block weeds. Maybe not as effective at preventing weed seed germination as black, but better than all white. Can also get 3.2 oz. White, call for prices & sizes.

DeWitt Custom Woven Shade Cloth

Custom order: Allow two weeks for delivery. This woven shade cloth is made from 100% polypropylene monofilament strands. UV stabilized, outlasts knitted shade cloth. DeWitt's sewing team can customize panels to any size. They use #4 brass grommets and 2-3/4" reinforcement tape, along the edges, which are double stitched for extra holding power.

Available Shade Percentages: 30%, 47%, 55%, 63%, 73%, & 80%. Standard widths are 6, 10', & 12' and any of these can be seamed together and even cut to make your width.

For a custom quote or to order: determine your required width, length, shade percentage and grommet spacing. Ships direct from manufacturer. Call for price quote, or to place an order.

Kool Ray Shade, Classic

Concentrated liquid shade. Common dilution rate is 1 part to 8 parts water, which reduces light transmission 31%. 1:3 ratio reduces light 45%. 1:1 ratio reduces light 65%. One gallon of solution covers 175 sq. ft. Can be applied by brush, roller or spray, but works best when spray applied. Usually applied in spring or summer then during the course of the year, the shading will slowly wear off allowing for increased light levels as the daylight decreases. Frost will also loosen shade. Keep product from freezing.

Euroemme Heavy-Duty Exhaust Fans

Centrifugal shutter system keeps the efficiency of the fan at peak all the time by keeping the shutters fully open. Shutters do not have to be cleaned regularly. Heavy duty galvanized shutters are tightly closed when the fan is not in operation, preventing any air leakage. Considering the effect of dirty shutters on the other slant wall fans, the efficiency of the Euroemme fan is 15-25% better than any other fan.

EasyAlert Wireless Alarm System

This wireless alarm system is an advanced monitoring system that allows you to connect up to 16 wireless sensors, plus hardwired sensors. Wireless sensors have a range of up to 1 mile (line of sight), making this the ideal alarm system to monitor your property without running wires to every structure. With battery backup, the alarm will continue to monitor during a power failure.

Customizable: This system isn't limited to temperature monitoring.

Wireless Alarm System Base: Packaged with 110VAC charger and 1 temperature sensor, pre-programmed and ready to use. Enclosed in a plastic case with a speaker that produces a sharp chime when a transmitter is triggered. Adjustable volume. Can be programmed to produce a unique chime for each transmitter. If you put the base in your house, these chimes can wake you up. Or in an outbuilding we recommend you connect it to an outdoor siren. It has a **built-in power failure & low battery alarm**. Programming is done in the base, eliminating the need for a computer.

Hi/Lo Temperature Sensor monitors air temperatures. High and low temperature set points can be set between 40° and 110°F. Wireless, uses 4 AA batteries. Sensor is a pair of weatherproof thermostats with a built in transmitter. By using these mechanical thermostats it makes for a very reliable easy to use transmitter.

Sensaphone®

Remote Monitoring. Protect your investment even when you can't be there. Monitors your unattended facility to detect power failures, temperature extremes, intrusions, water incursion, sounds such as smoke and burglar alarms, and other conditions of your choice.

Alerts you immediately if problems arise. In case of alarm automatically contacts you by phone at up to four (Sensaphone 400) or eight (Sensaphone 800) different phone numbers.

The system communicates in voice synthesized English. Call in any time from any phone for status reports which include power status, temperature, zone status, and also lets you listen to actual sounds onsite.

Includes built-in sensors to monitor a variety of conditions: High sound level; AC electric power failure; Battery backup; Temperature (uses 1 input). Configurable inputs work with temperature sensors and normally open & normally closed switch type sensors. If you use SEN2 Prewired Temperature Alert or GEA300 Thermalarm II you can parallel wire multiple units to one input.

Works on regular phone lines and/or on fax lines. Will not interfere with operation of answering machine and will not answer except selectively. Fully and easily programmable.

Post Planters

The Post Planter is a heavy duty pot made from PVC, for many years of use. It is the perfect dress up for that bare corner on your deck railing, or to brighten up that boring picket fence in your front yard. The square bird bath adds flare. There are many possible combinations.

PVC fencing colors. White, unless specified otherwise. For almond add **A** to item number. For clay add **C** to item number.
Example: PP 03C = Clay Pot

Item #	Description	Each	Case of 15 pcs
PP 03	White Post Planter, Pot	\$14.50	\$195.00 = \$13.00 each
Item #	Description	Each	Case of 4 pcs

PP 05	White Bird Bath	\$15.00	\$54.00 = \$13.50 each
PP 06	White 30" Post Kit	\$49.50	\$188.00 = \$47.00 each

Fogit Greenhouse Sprayer

The Fogit Sprayer is an easy to use, low volume chemical applicator designed with smaller greenhouses in mind. It can easily apply a wide variety of chemical formulations using a highly concentrated spray solution. The nozzle generates micro-particles that fill the entire treatment area and ensure complete and even coverage of all plant surfaces. This method of applying chemical solutions eliminates costly run-off and reduces the amount of chemical needed. Air agitation—keeps chemicals in suspension.

Standard Treatment Area: Up to 5,000 sq. Ft. (7,000 sq ft with circulation fans). **Tank size:** approx. 7 Liters (7.4 quarts)
Compressor required: 4 CFM at 25 PSI (9 CFM for dual head)
Now standard with stainless steel head(s) and larger tank.

Item #	Description	Price
FGS01	Fogit Greenhouse Sprayer	\$448.00
FGS02	Fogit Greenhouse Sprayer, 2 nozzle	\$565.00
